

EU Plug Soldering Iron

This soldering iron is equipped with an EU plug for use in compatible outlets. It is suitable for electronics repair, DIY projects, and other soldering applications.

Product Overview

Professional Soldering Precision

This soldering iron is engineered for high-precision electronics repair and DIY applications. Featuring an ergonomic handle for extended use and a heat shield for enhanced safety, it provides reliable performance for various soldering tasks. Designed with an integrated EU plug, it is ready for immediate deployment in compatible regional power environments.

Electrical Specifications

Operating Voltage

230 V

Min Voltage

240 V

Max Voltage

Plug Standard

EU Plug

Design & Ergonomics

Material Composition

- Black plastic body
- Orange rubber grip
- Silver metal tip

Key Features

Ergonomic handle, Heat shield, Pointed tip
