

Euro III/IV Truck Diesel Engine

This diesel engine series is designed with frontline science and technology. It features advanced combustion technology for improved fuel efficiency and reduced emissions, while also meeting Euro III and IV standards.

Overview

High-Performance Diesel Engine Series

This series of diesel engines is engineered for medium to heavy-duty commercial vehicles, including trucks, buses, and special-purpose transport. Utilizing advanced electrically-controlled high-pressure common rail systems, these engines deliver optimized combustion, improved fuel efficiency, and compliance with Euro III and IV emission standards. Designed for durability and reliability, they offer a versatile power range suitable for demanding operational environments.

Performance Metrics

WP12N Series Performance

480 ps

Max Power

1900 rpm

Rated Speed

WP10N Series Performance

336 ps

Max Power

1900 rpm

Rated Speed

WP4/WP6 Series Performance

240 ps

Max Power

Technical Details

Emission Standards

Euro III, Euro IV

Fuel System Technology

BOSCH electrically-controlled high pressure common rail system

Application

Suitable Applications

- Medium-Heavy Vehicles
- Buses
- Special Vehicles
