

European Standard Electrical Cord Set

This is an electrical cord set with a European-style plug (Type C or E/F) on one end and a matching socket on the other. It is white and used for general purpose electrical connections.

Product Overview

Reliable European Power Connectivity

This European Standard Electrical Cord Set is designed for secure and versatile power distribution across various European environments. Featuring a standard two-prong plug and a compatible socket interface, it ensures reliable connectivity for lighting fixtures and general-purpose electrical applications. The durable PVC insulation construction provides long-lasting performance and safety for professional installation requirements.
