

# European Standard Two-Prong Power Cord

This is a standard European two-prong power cord used for connecting electrical devices to power outlets. The cord features a molded plug for durability and is insulated with a PVC jacket for safety.

## Product Overview

### European Standard Power Connectivity

This European standard two-prong power cord is engineered for reliable connectivity in a wide range of indoor electrical applications. Featuring a durable molded plug design, it ensures safety and longevity for household appliances, lighting fixtures, and various electronic devices. The cable is protected by a flexible PVC jacket, offering both electrical insulation and ease of handling for everyday use.

## Technical Specifications

### Usage Environment

Indoor Use

### Common Applications

- Household Appliances
- Lighting Fixtures
- Electronic Devices

Plug Configuration	European Standard Two-Prong
Insulation Material	PVC Jacket

## Physical Characteristics

Color	White
Design Features	Molded Plug, Flexible, Insulated
