Product Overview

The 6001 series offers a wide range of finishes and configurations for modern electrical installations.

Sirode 6001 Series Professional Electrical Components

The 6001 series is a premium collection of European-standard wall switches and sockets engineered for both residential and commercial electrical installations. Featuring a distinctive square brushed-metal faceplate with circular recessed inserts, these units combine modern aesthetics with robust, long-term performance. The series supports versatile configurations including single and double-rocker switches as well as grounded power sockets, ensuring seamless integration into standard flush-mount electrical boxes.
