

European to UK Travel Adapter

This travel adapter converts European plugs (Type C) to UK plugs (Type G). It features robust construction and reliable performance and is rated for 10/16A, 250V.

Overview

Reliable Power Conversion

This European to UK travel adapter is designed to seamlessly convert standard European Type C plugs for use in UK Type G outlets. Constructed with durable ABS material and high-quality copper components, it ensures a stable and safe power connection for your appliances. Featuring a 4.0mm pin design, this adapter is a reliable solution for international travelers needing to power their devices while in the United Kingdom.
