

Evaporative Air Cooler and Humidifier

This evaporative air cooler functions as both an air cooler and humidifier. It is designed for low power consumption and is suitable for both home and industrial environments.

Product Overview

High-Efficiency Evaporative Cooling

This evaporative air cooler and humidifier is designed to provide efficient cooling for spaces ranging from 20 to 50 square meters. Featuring a powerful centrifugal motor, it delivers a robust airflow of 4500 m³/h while maintaining operational noise levels below 54 dBA. With a 35-liter water tank and low power consumption of 100W, it offers an economical and effective climate control solution for professional environments.

Performance Metrics

Key Performance Indicators

4500 m³/h

Air Flow

35 L

Water Storage

100 W

Power Input

Technical Specifications

Electrical Requirements	120-240V / 50-60Hz
Motor Type	Centrifuge
Water Consumption	3-4 L/h
Noise Level	< 54 dBA
Effective Cooling Area	20-50 m ²

Physical Dimensions

Physical Dimensions & Weight

Attribute	Value
Size (LxWxH)	610 x 440 x 1310 mm
Weight	25 kg

Certifications & Quality

Supplier Guarantees

Trade Assurance • 100% Guarantee • Gold Supplier

Quality Standards

CE, ISO 9001, CQC, Bureau Veritas
