

Excavator Arm Cylinder Seal Kit

O-ring kits with accurate dimensions for excavator machines. These O-rings are compliant with international standards and constructed with NBR materials.

Overview

High-Performance Hydraulic Sealing Solutions

This excavator arm cylinder seal kit is engineered to provide reliable sealing performance in heavy-duty hydraulic applications. Constructed from high-quality NBR material, these seals offer excellent resistance to wear, abrasion, and extrusion to ensure an extended service life. The comprehensive kit includes all necessary components for a complete cylinder overhaul, including rod seals, piston seals, wiper seals, and O-rings.

Technical Specifications

Kit Components

- Rod Seals
- Piston Seals
- Wiper Seals
- O-Rings

Primary Material

NBR (Nitrile Butadiene Rubber)

Performance Features

Wear Resistant, Abrasion Resistant, Extrusion Resistant, Heavy-Duty

Compatibility & Service

System Compatibility

PC220-7 Hydraulic Systems • Arm Cylinders • OEM Standard

Warranty Coverage

6 Months

Warranty Period

Service Highlights

- Top-grade warranty service
- Custom product supply based on request
- Full series availability for major excavator models
