Product Overview

Heavy-Duty Excavator Bucket

This high-strength steel excavator bucket is engineered for robust digging and material handling across demanding environments. It features reinforced cutting edges and wear-resistant teeth to ensure optimal performance and an extended service life. Designed for versatility, this attachment provides secure fitment for a wide range of excavator models, making it an ideal choice for construction, mining, and earthmoving operations.

Technical Specifications

Ideal Applications

- Construction
- Mining
- Earthmoving
- General material handling

Material Construction

High-strength steel

Key Features

Reinforced cutting edges, Wear-resistant teeth, Wear plates, High-strength steel
