

Excavator Bucket Side Cutter

This side cutter, also known as a side protector, wing shroud, or vertical shroud, is designed to protect the bucket or leading edge of heavy machinery. Made of durable material, it provides enhanced wear resistance in demanding applications.

Product Overview

Heavy-Duty Bucket Protection

This side cutter, also referred to as a side protector, wing shroud, or vertical shroud, is engineered to protect the bucket and leading edges of heavy machinery. Constructed from durable, wear-resistant materials, it is designed to withstand the rigors of construction, mining, and other demanding industrial applications. The component features a precise fit for easy installation and removal, helping to minimize maintenance downtime and extend the operational lifespan of your equipment.

Compatibility & Range

Compatible Equipment Types

Excavators, Loaders, Hydraulic Shovels, Electric Shovels, Bulldozers, Motor Graders
