Overview

High-Performance Excavator Teeth

These high-strength excavator bucket teeth are engineered for optimal digging performance and durability in demanding construction environments. Constructed from hardened steel, they provide excellent resistance to wear and impact, ensuring extended service life and reduced downtime. Designed with a tapered profile, these teeth offer efficient penetration and a secure fit for various excavator models.

Compatibility

Compatible Models	EC360TL, LG6360TL, LG6360RC, EC360
