Product Overview

High-Performance Excavator Bucket Teeth

These high-strength steel bucket teeth are precision-engineered for the PC300 series of construction machinery. Designed to provide exceptional durability and wear resistance, they are ideal for demanding excavation applications. Available in both RC (Rock) and TL (Tiger/Long) configurations, these components ensure optimal digging performance across various ground conditions, including soil and rock.

Compatibility & Specs

Reference Part Numbers

- 207-70-14151
- 208-70-141521

Compatible Series	PC300 Series
Configuration Types	RC (Rock), TL (Tiger/Long)

Material & Durability

Process

Forged • Heat-treated

Key Features

- Enhanced wear resistance
- High impact strength
- Precision-engineered fit
- Optimized for abrasive conditions

Material	High-strength alloy steel
