Product Overview

High-Performance Excavator Tooth

The 18S top pin tooth is engineered for demanding earthmoving applications, offering reliable performance in digging and trenching tasks. Designed for seamless integration with WS55 and DH55 adapter systems, this component ensures optimal operational efficiency and extended service life. Its durable construction is built to withstand the rigors of construction environments, helping to reduce downtime and maintain productivity.

Compatibility & Specs

Tooth Series	18S
Compatible Models	WS55, DH55
Attachment Configuration	Top Pin
Part Reference	2713-9051

Applications

Primary Applications

- Excavation
- Trenching
- Earthmoving

Compatible Equipment

Excavators • Loaders
