Product Overview

Precision-cast 1U3352 bucket tooth designed for high-abrasion environments.

High-Performance J350 Series Bucket Tooth

The 1U3352 bucket tooth is engineered for J350 series excavators, providing exceptional digging performance and extended wear life in demanding construction environments. Manufactured using precision casting and alloy steel, it features high impact toughness and a hardness rating of HRC 47-52. This component is designed to meet or exceed OEM standards, ensuring a precise fit for heavy-duty excavation, trenching, and material handling.

Technical Specifications

Manufacturing Process

- Precision casting
- CNC drilling for accurate bolt hole alignment
- Automatic electrostatic spray painting

| | |
|-------------------|-------------|
| Material | Alloy steel |
| Hardness | HRC 47-52 |
| Net Weight | 6.2 kg |

Compatibility & Application

| | |
|----------------------|--|
| Compatible Machines | Caterpillar, Komatsu, JCB, Hyundai, Doosan |
| Series Compatibility | J350 Series |
