Product Overview

High-Performance Excavator Bucket Tooth

This replacement excavator bucket tooth is engineered for heavy-duty digging and excavation applications. Utilizing high-strength forged steel, it is designed to withstand abrasive conditions while providing an extended wear life. The tooth features a sharp tip for efficient ground penetration and a robust build for optimal performance in demanding construction environments.

Technical Specifications

Weight

8.8 kg

Weight Range Min

9.9 kg

Weight Range Max

Manufacturing Process

Forged Steel • Heavy-Duty

Alternate Part IDs

- 713Y00032
- 2713-1234

Part Number

2713-0032RC

Compatible Machinery

DH360-5
