

Excavator Bucket Tooth 7T3402RC Replacement for CAT J400

This aftermarket bucket tooth is designed as a replacement for CAT J400 series excavators. It is manufactured from alloy steel for reliable performance and durability.

Product Overview

Heavy-duty alloy steel bucket tooth designed for high-impact rock excavation.

High-Performance Rock Chisel Tooth

This 7T3402RC replacement tooth is engineered for CAT J400 series equipment, specifically designed for rock chisel applications. Manufactured using high-quality alloy steel and a precision casting process, it offers exceptional durability in abrasive environments. It is a reliable solution for heavy-duty excavation and loading tasks, ensuring optimal penetration and machine efficiency.

Available Colors	Yellow or custom options

Technical Specifications

Material & Durability

470 HB Hardness (Min)	1450 Rm-N/mm² Tensile Strength	15 J Impact Toughness
Yield Strength		1100 Re-N/mm ²
Production Method		Casting
Material		Alloy steel

Compatibility

Compatible Models

- 980G
- 322
- 325
- 330

Fitment System

J400 Series

Applied Machines

Loader, Excavator

Installation Components

Required Hardware

Component	Part Number
Matched Pin	7T3408
Matched Retainer	8E8409
