Product Overview

Heavy-Duty Excavator Component

This excavator bucket tooth adapter is engineered for PC120-3 series construction machinery. Designed to facilitate the secure attachment of digging teeth, it ensures reliable performance and efficiency during earthmoving and excavation tasks. Built for durability in demanding construction environments, this component is an essential replacement part for maintaining equipment functionality.

Compatibility & Specifications

Associated Part References

- 19011
- 202-70-12130

Component Type

RC Tooth Adapter • Excavator Spare Part

Compatible Machine Models

PC120-3

Technical Details

Key Performance Metrics

1 Digging

Application

1 Hardened Steel
