Product Overview

Heavy-Duty Excavation Components

This set includes the 6Y3552 tooth and 104-9279 adapter, engineered for robust digging and earthmoving applications. Manufactured from high-strength alloy steel, these components are designed to withstand demanding construction environments while providing optimal penetration and wear resistance. The adapter ensures a secure and reliable attachment to the excavator bucket, helping to enhance operational productivity and reduce downtime.

Technical Specifications

Part Numbers

- Tooth: 6Y3552
- Adapter: 104-9279

Compatible Models

- R550HD
- JD-2

Material	High-strength alloy steel
Quality Standards	ISO 9001:2008, Certified
