

Excavator Bucket Tooth Tip

This bucket tooth tip is designed for optimal digging performance. Constructed from hardened steel, it offers extended wear life and abrasion resistance.

Product Overview

High-Performance Ground Engaging Tools

These replacement bucket tooth tips are engineered for heavy-duty construction machinery, offering superior digging performance and enhanced durability in demanding earthmoving applications. Crafted from high-grade hardened steel, they provide excellent resistance to abrasion and impact during excavation, trenching, and material handling. Each component is precision-manufactured to ensure a secure fit and extended wear life for excavators, loaders, and bulldozer rippers.

Compatibility

Part Series Coverage

- SDLG Series
- XCMG Series
- Liugong Series
- Yuchai Series
- Cheng Gong Series

Supported Machinery

Excavators, Loaders, Bulldozers, Motor Graders

Technical Specifications

Available Wear Components

- Bucket Tooth Tips
- Tooth Bolts
- Lock Pins
- Pin & Retainers
- Segments
- Protectors
- Side Cutters

Construction Material

Hardened Steel • Abrasion Resistant
