

Excavator Cutting Edge Blade

This cutting edge offers high wear resistance and enhanced production efficiency. Its design ensures high reliability, hardness, toughness, and high fatigue resistance for demanding applications.

Product Overview

High-Performance Ground Engaging Tools

This heavy-duty cutting edge is engineered for maximum durability in abrasive construction environments. Designed to provide precise material handling and extended wear life, it ensures optimal machine efficiency for grading, leveling, and clearing applications. Built from high-strength steel, this component significantly reduces machine downtime while maintaining consistent performance across various heavy equipment models.

Compatibility

Compatible Machine Types

- Loaders
- Bulldozers
- Motor Graders
- Tractors
- Scrapers
- Electrical Shovels
- Underground Loaders

Compatible Machine Brands

Volvo, Komatsu, John Deere, Case, Liebherr, CAT, P&H, Bucyrus, TZ, Sandvik

Available Components

Available Spare Parts Catalog

Category	Items
Ground Engaging	Bucket teeth, adapters, lip/side/heel shrouds, cutting edges
Undercarriage	Track shoes, chains, rollers, idlers, sprockets
Hydraulics	Pumps, valves, cylinders, seal kits
Engine/Filtration	Engine kits, injectors, radiators, filters
