Product Overview

High-Performance Excavator Digging Bucket

This heavy-duty excavator bucket is engineered for superior digging, loading, and material handling efficiency. Constructed from high-strength, wear-resistant steel, it features an aggressive leading-edge design and a slimmer profile to maximize ground penetration and breakout force. Designed to withstand demanding environments, this bucket offers extended service life and reliable performance across various soil conditions.

Key Features

Design Advantages

- Aggressive leading edge design
- Slimmer profile for better penetration
- Greater nose strength and fatigue life
- Reduced weight using high abrasion resistant materials
- More usable wear metal for longer point life

Material Technology

GN T3 Alloys, High Abrasion Resistant Steel, Reinforced Edges, Impact Resistant

Compatibility

Compatible Machine Brands

Komatsu • Kobelco • Caterpillar • Hitachi • Daewoo • Volvo

Maintenance & Components

Key Components

- High-strength steel pins
- Hardened bushings
- Variety of approved tooth systems
- Wear shrouds
- Side cutters
