

Excavator Fuel Injection Pump Plunger

7.990-8.005mm

This fuel injection pump plunger is designed for use in 320D pump systems. It features a diameter tolerance of 7.990-8.005mm.

Product Overview

Precision engineered plunger for 320D pump systems with diameter tolerance of 7.990-8.005mm.

High-Precision Fuel Injection Plunger

This fuel injection pump plunger is engineered for optimal performance in 320D pump systems. With a precise diameter tolerance range of 7.990mm to 8.005mm, it ensures reliable engine operation and durability. Manufactured from high-speed steel, this component is designed to meet the rigorous demands of heavy-duty excavator applications.

Technical Specifications

Size Variants

- 7.990
- 7.991
- 7.992
- 7.993
- 7.994
- 7.995
- 7.996
- 7.997
- 7.998
- 7.999
- 8.000
- 8.001
- 8.002
- 8.003
- 8.004
- 8.005

Material	High speed steel
Diameter Tolerance	7.990 - 8.005mm
