

# Excavator Gasket Ring

Gasket rings are made to fit accurately in Excavator machines. They are made with PTFE materials and comply with international standards.

## Product Overview

### Precision-Engineered Sealing Solutions

These excavator gasket rings are designed for robust sealing applications in heavy machinery and industrial equipment. Constructed from high-quality PTFE, they provide a reliable barrier against leaks and contaminants to ensure optimal performance and component longevity. Engineered for durability, these seals offer excellent resistance to compression, wear, and chemical degradation, making them ideal for hydraulic systems, pumps, and valves.

## Technical Details

Material	PTFE
Warranty	6 Months

## Compatibility

Compatible Brands	Case, Sany, Komatsu, Volvo
-------------------	----------------------------

## Service & Quality

### Product Category

OEM Product • Excavator Seal Kits
