Product Overview

Professional Excavator & Construction Machinery Components

This comprehensive range of engineering machinery parts is designed to support the maintenance and repair of excavators, bulldozers, loaders, and other heavy equipment. Our inventory includes critical hydraulic components, engine cooling assemblies, and chassis parts, ensuring reliable performance in demanding construction environments. Each component is built for durability and precise fitment, helping to minimize downtime and extend the service life of your machinery.

Compatible Machinery Types

Excavators, Bulldozers, Loaders, Milling Machines, Pavers

Hydraulic Systems

Available Hydraulic Parts

- Travel Motor Assemblies
- Rotary/Swing Motors
- Hydraulic Valves
- Final Drive Units

Key Performance Metrics

24 hours

Technical Support Availability

Engine & Cooling

Cooling System Specifications

- High-performance engine cooling fan assemblies
- Multi-blade design for enhanced airflow
- Optimized for heat dissipation
- Robust construction for extended service life

Service & Support

Service Capabilities

Service Category	Description
Parts Supply	Full range of wearing and chassis parts
Repair Services	Comprehensive repair for excavators and construction machinery
Export Processing	International trade and export support
