

Excavator Hydraulic Cylinder Buffering Ring

Buffering ring with accurate dimensions for excavator machines. Complies with international standards and is made of HBY sealing materials.

Product Overview

High-Performance Buffering Ring

This precision-engineered buffering ring is designed for use in heavy-duty hydraulic cylinder applications. Manufactured from high-strength HBY material, it provides essential support to primary sealing elements, preventing extrusion and deformation under high-pressure conditions. Designed to meet OEM standards, this component helps extend the service life of hydraulic systems and enhances overall sealing reliability.
