

Excavator Hydraulic Cylinder Seal Kit

This O-ring kit provides accurate dimensions for use in excavator machines. Compliant with international standards, the O-rings are constructed from NBR materials.

Product Overview

Professional Hydraulic Sealing Solution

This hydraulic cylinder seal kit is engineered to provide a tight and secure seal, preventing leaks and maintaining optimal system pressure. Constructed from high-quality materials including rubber, polyurethane, and metal, it ensures reliable performance and durability in demanding hydraulic applications. It is a comprehensive maintenance solution designed to meet stringent operational requirements.

Specifications

Material	NBR
Warranty Time	6 Months

Compatibility

Part Number	60018972
System Compatibility	SY20TAjust

Features

Key Features

- OEM Quality Standards
- Comprehensive sealing solution
- Includes rubber, polyurethane, and metal components
- High-pressure leak prevention
