Overview

Versatile Material Handling Solution

This hydraulic multi-function grab is engineered for heavy-duty material handling tasks, including the transport of large stones, raw logs, and construction debris. Designed for excavators, the attachment features a robust hydraulic system that delivers precise control and powerful gripping force. Its durable construction ensures reliable performance across diverse sectors such as forestry, demolition, and recycling operations.

Key Features

Suitable Applications	Construction, Demolition, Forestry, Recycling, Log Handling, Rock Handling
Customization	Yes

Technical Details

Operational Capabilities

- Powerful hydraulic gripping force
- Robust rotating mechanism
- Enhanced maneuverability
- Precise material placement

Material Composition	High-strength steel
