

Excavator Hydraulic Pump for Komatsu PC300-7

This hydraulic pump is designed for Komatsu PC300-7 excavators. It is a key component of the hydraulic system, providing fluid power for excavator functions like digging and lifting.

Product Overview

High-Performance Hydraulic Pump

This hydraulic pump is engineered specifically for heavy-duty excavator applications, ensuring reliable fluid power for critical functions such as digging, lifting, and maneuvering. Designed for durability in demanding construction environments, it provides optimal fluid flow and pressure to maintain machine efficiency. Regular maintenance is recommended to ensure long service life and consistent performance under rigorous use.

Compatibility & Application

Supported Component Types

- Hydraulic Pump
- Travel Motor Assembly
- Swing Motor Assembly
- Rotary Reducer Assembly

Compatible Machine Models

PC300-7

Technical Specifications

Design Focus

High Pressure • Optimal Flow • Heavy-Duty Construction

Primary Function

Hydraulic fluid power generation for excavator systems

Available Travel Motor Brands

Available Motor Series

- Teijin
- Nabtesco
- KYB
- Nachi-Fujikoshi
- Toshiba
- Kawasaki
