

Excavator Hydraulic Seal Kit

Seal kit designed for hydraulic and pneumatic systems of excavator machines. It consists of NBR material sealing rings with accurate dimensions, compliant with international standards.

Product Overview

High-Performance Hydraulic Sealing Solution

This excavator hydraulic seal kit is engineered to maintain system integrity and prevent leaks in heavy-duty machinery. Comprised of high-quality rubber, polyurethane, and PTFE components, these seals ensure optimal pressure retention in hydraulic cylinders, pumps, and valves. Designed to match the quality of genuine parts, this kit offers a cost-effective alternative to keep your equipment operating efficiently.

Technical Specifications

Compatible Systems

- Hydraulic Systems
- Pneumatic Systems
- Hydraulic Cylinders
- Pumps
- Valves

Material Composition	Rubber, Polyurethane, PTFE
Part Number	60140867

Service & Warranty

Warranty Period

6 Months

Warranty Duration

OEM Quality	Yes
