

Excavator Machine Dust Ring

This dust ring is made to fit excavator machines. It is constructed from PTFE material and meets international standards.

Product Overview

High-Performance Excavator Dust Ring

This high-performance dust ring is engineered for demanding hydraulic and pneumatic applications, providing superior sealing efficiency. Constructed from premium PTFE materials, it effectively prevents dust, dirt, and contaminants from entering critical machinery components. Its robust multi-lip design ensures extended service life and reliable performance, helping to reduce overall maintenance costs for heavy equipment.

Technical Specifications

Product Type

OEM Standard • Hydraulic Seal • Pneumatic Seal

Material

PTFE

Warranty Period

6 Months

Compatibility

Compatibility Details

- Full series of sealing products available
- Custom production available upon request

Compatible Equipment Brands

Case, Sany, Komatsu, Volvo
