

Excavator Ripper Tooth 175-78-31320

This ripper tooth is designed for excavators to improve excavation and ground penetration. It is manufactured from high-strength alloy steel for enhanced durability and wear resistance.

Overview

High-Performance Excavator Ripper Tooth

This excavator ripper tooth is engineered for superior ground penetration and durability in demanding excavation and mining environments. Manufactured from high-strength alloy steel, it is designed to withstand significant wear while maintaining structural integrity. Its precise geometry ensures a secure fit for various heavy machinery ripper assemblies, optimizing performance and extending service life.

Compatibility

Compatible OEM Part Numbers

1U3302, 1U3252, 1U3352, 9W8452, 6I6602, 9W8552, 7T3402, 4T5501, 6Y0309, 9W2451, 9W2452, 2713Y1217, E161-3027, E262-3046, 53103205, 53103208, 53103209, 1U1357, 6I6354, 6I6404, 8E0464, 6I6464, 1U1304, 114-0464, 3G8354, 3G6304
