

Excavator Side Cutter

Excavator side cutters enhance the performance and longevity of heavy machinery. These components provide superior protection against wear and tear in demanding industrial applications.

Product Overview

Heavy-Duty Side Protection

These high-durability side cutters, also known as side protectors, wing shrouds, or vertical shrouds, are engineered to enhance the performance and longevity of heavy machinery. Designed to withstand harsh operating conditions, they provide superior protection against wear and tear in demanding industrial, mining, and construction applications. By shielding critical components, these parts ensure optimal machine efficiency and help significantly reduce operational downtime.

Compatibility & Fitment

Compatible Equipment

Excavators, Loaders, Hydraulic Shovels, Electric Shovels, Bulldozers, Motor Graders

Product Range

Available Wear Parts

- Side Cutters
- Side Protectors
- Wing Shrouds
- Vertical Shrouds
- Ripper Teeth
- Tooth Tips/Points
- Tooth Adapters/ HOLDERS
- Wear Caps
- Lip Shrouds
- Heel Shrouds
- Kwiklok Liners
