

Excavator Tooth Adapter and Retainer Set

This system provides high wear resistance for increased production efficiency. It is engineered to be hard, tough, and highly reliable with high fatigue resistance.

Product Overview

High-Performance Ground Engaging Tools

This comprehensive set of excavator teeth, pins, and adapters is engineered for maximum durability and wear resistance in demanding earthmoving applications. Each component is crafted from high-grade alloy steel and undergoes advanced heat treatment processes to ensure an extended service life. The system is designed to provide optimal penetration and material flow, serving as a robust interface for heavy machinery.

Compatibility & Series

Supported Series

K-series, J200, J220, J250, J300, J350, J400, J450, J550, J600, J700, J800

Application

Compatible Machinery

- Excavators
- Loaders
- Bulldozers
- Motor Grader Rippers

Component Details

Included Components

- Bucket Teeth
- Tooth Pins
- Tooth Adapters
- Retainers
