

Excavator Tooth and Vertical Adapter Set

This excavator tooth and vertical adapter set is engineered for efficient digging and material penetration. Its top pin design ensures secure attachment and reliable performance in demanding construction environments.

Product Overview

High-Performance Excavator Ground Engaging Tools

This 35S Top Pin Tooth and Vertical Adapter set is engineered for demanding construction, mining, and earthmoving applications. Designed for superior material penetration and digging efficiency, the set features a robust top-pin attachment system that ensures secure, reliable mounting. Constructed from high-strength, wear-resistant materials, these components deliver stable performance, minimize machine downtime, and provide optimal force distribution during heavy-duty operations.

Technical Specifications

Tooth Type	35S Top Pin Tooth
Adapter Type	35S Vertical Adapter
Reference Part Numbers	205-70-74272, 3803 35

Performance Features

Key Performance Attributes

- Wear-resistant construction
- High-strength material composition
- Top pin secure attachment design
- Vertical adapter for precise alignment
- Optimized for heavy-duty digging and excavation

Suitable Applications

Construction • Mining • Earthmoving
