

Excavator Tooth Point 195-78-71320

This excavator tooth point is made for earthmoving machinery. It is engineered to withstand abrasive conditions and high-impact forces during excavation and material handling.

Overview

High-Performance Excavator Tooth Point

This excavator tooth point is a durable and reliable earthmoving component engineered to withstand abrasive conditions and high-impact forces during excavation and material handling. Manufactured from high-quality alloy steel and heat-treated for optimal hardness, this part ensures superior wear resistance and longevity. Its design optimizes penetration and material flow, promoting increased productivity and reduced downtime in demanding construction and mining applications.
