

Excavator Tooth Point with Pin and Adapter

This tooth point offers high wear resistance and increased production efficiency. Its robust construction provides high reliability and fatigue resistance for demanding applications.

Product Overview

High-Performance Excavator Ground Engaging Tools

These heavy-duty tooth points, pins, and adapters are engineered for superior durability and wear resistance in demanding earthmoving and construction environments. Designed for optimal penetration and material flow, these components ensure high productivity and efficient excavation across various soil and rock conditions. The robust construction and secure locking mechanisms provide reliable performance and extended service life for construction machinery.

Compatibility

Compatible Brands

- CAT
- CASE
- JOHN DEERE
- KOMATSU
- HITACHI
- SUMITOMO
- KOBLECO
- KUBOTA
- YANMAR
- VOLVO
- JCB
- DOOSAN
- HYUNDAI
- SANY
- XCMG
- LIUGONG
- SHANTUI

Compatible Machinery

Excavators, Loaders, Bulldozer Rippers

Product Range

Available Series

SV2 Series • Ultralok Series • Super V Series

Component Types

- Tooth Points
- Lock Pins
- Adapters
