Product Overview

High-Performance Excavator Ground Engaging Tools

This excavator tooth system, featuring the V39SHV tooth and V39-50 bevel adapter, is engineered for heavy-duty excavation and material handling. Designed for durability and wear resistance, these components ensure stable performance even in demanding operating conditions. Precision-crafted for secure attachment, this system facilitates efficient digging and soil removal across various terrain types.

Technical Specifications

Identification Codes

- V89SYL
- 7831539
- V39T

Component Compatibility

V39SHV Tooth, V39TL Auger Tooth, V39-50 Bevel Adapter

Performance Features

Key Quality Features

Wear-Resistant • High-Strength Steel • Fine Workmanship • Stable Performance • Precision-Engineered
