Product Overview

Heavy-Duty Excavator Track Roller

This heavy-duty excavator track roller is engineered for optimal performance and durability in demanding construction and excavation environments. Featuring precision bearings and wear-resistant materials, it ensures smooth track movement, stability, and efficient load distribution. Designed to reduce maintenance costs, this component is essential for maintaining the integrity of your excavator's undercarriage system.

Technical Specifications

Hardening Depths

5.5 mm

Track Face Depth

2 mm

Corner Depth (min)

Surface Hardness

55 HRC

Material Composition

40CR, 50Mn

Manufacturing

Production Method

Forging • Casting

Certifications

ISO 9000, ISO 9001:2000
