Product Overview

Heavy-Duty Excavator Adapter

The 6l6356 welded-on adapter is engineered for robust performance in construction environments, specifically designed for E320 excavator models. Featuring a durable 40mm mounting interface, this component supports both left and right-hand configurations to ensure versatile application. Its high-strength steel construction provides a secure connection for essential attachments, making it an ideal choice for demanding tasks such as digging, trenching, and material handling.
