

Exhaust Fan with Metallic Housing

This is a high-performance electrical fan designed for exhaust applications. It features durable construction with a metallic housing and aerodynamically optimized blades for efficient airflow.

Overview

High-Performance Metallic Exhaust Fan

This durable exhaust fan is engineered for high-performance ventilation in both household and industrial environments. Featuring a robust metallic housing and aerodynamically optimized blades, it ensures efficient airflow while maintaining low noise levels. Designed for reliability, this unit is an ideal solution for effective air circulation and exhaust applications.

Technical Specifications

Housing Material	Metallic
Application	Household, Industrial, Ventilation
