

Exhaust Header for Enhanced Engine Performance

This exhaust header improves engine exhaust flow for increased horsepower. It is constructed from stainless steel and features mandrel-bent tubing for optimal exhaust gas velocity.

Product Overview

High-Performance Exhaust Header

Engineered for optimal exhaust flow and increased horsepower, this high-performance exhaust header is a critical upgrade for engine efficiency. Constructed from durable stainless steel with precision mandrel-bent tubing, it promotes superior exhaust gas velocity and scavenging. Designed for specific vehicle applications, it ensures a precise fit and reliable long-term performance.

Technical Specifications

Material	Stainless Steel
Configuration	4-into-1
Model Identifier	N31101-L
Key Performance Features	Mandrel-bent tubing, Precision welds, Optimized scavenging, Corrosion resistant

Installation & Compatibility

Installation

- Direct fitment design
- Includes mounting flanges with bolt holes
- Integrated mounting bracket for secure attachment
