

Expansion Anchor with Metal Collar

This expansion anchor is made from white plastic and features a metal collar. It is designed for secure fastening in concrete, brick, or block.

Product Overview

Professional Expansion Anchor

This expansion anchor is engineered for secure fastening applications in concrete, brick, and block substrates. It features a robust white plastic body with an integrated metal collar for enhanced stability and load-bearing capacity. The design includes longitudinal ribs and expansion slots to ensure a firm grip and reliable installation in various masonry materials.

Technical Specifications

Compatible Surfaces

- Concrete
- Brick
- Block

Key Design Features

Metal Collar • Longitudinal Ribs • Expansion Slots • Pointed Tip

Material Composition

Plastic, Metal
