Product Overview

Professional Cargo Handling Solution

This extendable cargo plank is designed to provide secure and efficient load handling in logistics, warehousing, and transportation environments. Constructed from robust, durable aluminum, the telescopic design allows for adjustable lengths to accommodate various vehicle and loading dock configurations. It features an integrated locking mechanism for enhanced stability and safety during operation.

Technical Specifications

Material	Aluminum
Design	Telescopic / Extendable
Safety Features	Locking Mechanism, Stable Positioning

Compliance & Certification

Certifications

CE • TÜV Rheinland • Geprüfte Sicherheit

Usage

Ideal Applications

- Logistics
- Warehousing
- Trucks and Trailers
- Cargo Transport Vehicles
