

External Concrete Vibrator

The external concrete vibrator is a robust and efficient machine designed for compacting concrete. It provides powerful vibrations to effectively remove air pockets and ensure uniform concrete density.

Product Overview

Professional Concrete Compaction

The ZF18 external concrete vibrator is a robust and efficient machine engineered for superior concrete compaction. It features a simple, portable structure that ensures high operational efficiency and long-term reliability in demanding construction environments. Ideal for precast concrete equipment, mixer plants, and various industrial machinery, this tool effectively removes air pockets to guarantee uniform concrete density.

Technical Specifications

Rated Power	2.2 kW
Vibration Force	0.75 kN
Voltage	3~220V
Rated Current	0.5 A
Frequency	50 Hz
Amplitude	2.3 mm
Net Weight	3.5 kg

Product Features

Primary Applications

- Concrete Compaction
- Soil Compaction
- Precast Concrete Equipment
- Mixer Plants
- Mine Machinery

Key Features

Portable Operation, High Efficiency, Reliable Construction, Simple Maintenance
