

F Female to F Male T-Shaped Connector

This T-shaped fitting is designed for connecting three pipes or hoses. It is constructed from durable material and suitable for use in various fluid and gas handling systems.

Product Overview

Versatile T-Shaped Connector

This F Female to F Male T-shaped connector is engineered for efficient fluid and gas distribution in industrial environments. Designed with a robust construction, it facilitates reliable connections across three distinct lines. Its specialized geometry ensures optimal flow management in complex piping or hose systems.

Technical Specifications

Connection Configuration	1x F Female, 2x F Male
Design Geometry	T-Shaped

Applications

Suitable Applications

- Fluid handling systems
- Gas handling systems
- Industrial piping
- Hose distribution networks

Material & Durability

Build Quality
