

# F4L913 Four-Cylinder Diesel Engine

The F4L913 engine is a robust four-cylinder diesel engine known for its durability and efficient performance. Its air-cooled design simplifies maintenance, making it suitable for various applications including construction and agricultural equipment.

## ADDITIONAL IMAGES

## Overview

### Robust Diesel Power

The F4L913 is a reliable four-cylinder diesel engine engineered for durability and efficient performance in demanding industrial environments. Its air-cooled design simplifies maintenance while ensuring consistent operation in harsh conditions, from extreme temperatures to high-altitude environments. With a compact footprint and high torque output, it provides a versatile and cost-effective power solution for a wide range of machinery.

## Technical Specifications

### Power Output

**50 HP**

Min Power

**70 HP**

Max Power

Displacement	3.8 L
Maximum Torque	250 Nm
Cooling System	Air-cooled
Fuel Injection	Direct Injection

## Key Features

### Key Benefits

- Compact and lightweight design
- Low fuel consumption
- Extended service life
- Easy cold-weather starting
- Simplified maintenance

## Applications

### Compatible Industries

Construction Machinery, Mining Machinery, Automotive, Agricultural Equipment, Power Generation, Marine

## Operating Conditions

### Environmental Adaptability

High Temperature Resistant • Cold Weather Reliable • High Altitude Capable • Poor Water Quality Tolerance
