

F6L913 Diesel Engine Cylinder Liner

This cylinder liner fits into the engine block, forming the cylinder. It is a critical functional part of the engine interior where the piston reciprocates.

Product Overview

Precision-Engineered Cylinder Liner

This cylinder liner is a critical component designed specifically for the F6L913 air-cooled diesel engine. Engineered for durability, it provides a wear-resistant surface for piston movement, ensuring optimal engine performance under high temperatures and pressures. Featuring 26 cooling ribs, this liner is built for efficient heat dissipation and reliable long-term operation.
