

F800 Reciprocating Mud Pump

This heavy-duty reciprocating pump is designed for oil and gas drilling operations. It is engineered for high-pressure, high-volume pumping of drilling mud.

Product Overview

F800 Reciprocating Mud Pump

The F800 is a heavy-duty reciprocating mud pump engineered for high-pressure, high-volume pumping in oil and gas drilling operations. Designed with a robust power end and fluid end, it ensures consistent and reliable mud circulation in demanding environments. Every unit undergoes rigorous testing, including a 4-hour run test, to ensure operational excellence and long service life.

Quality & Assurance

Warranty	1 Year
Factory Test Run	4 hours
Certifications	ISO 9001:2000, API 7K 0130, GOST, CE, 10 National Patents

Logistics & Availability

Standard Lead Time	40 days
Stock Availability	Yes
