

Fabric Steamer with Telescopic Pole

This garment steamer features a removable water tank and a detachable, double telescopic pole. The high steam output is designed to soften, refresh, and remove wrinkles from various fabrics including clothing, bedding, curtains, and upholstered furniture.

Overview

Professional Garment Care Solution

This high-performance fabric steamer is designed to efficiently refresh, soften, and remove wrinkles from a wide variety of textiles. Featuring a robust 2100ml water tank and a rapid 30-second preheating time, it offers professional-grade results for clothing, curtains, bedding, and upholstered furniture. The unit is built for convenience with a detachable double telescopic pole and adjustable steam settings to suit different fabric types.
