

Facial Recognition Video Intercom System

This system combines code, card, fingerprint, and facial scanning for versatile access. It provides comprehensive security through multiple authentication methods.

Overview

Advanced Security Access

This outdoor station features a robust stainless steel panel with toughened glass, designed for durability in various environments. It integrates a 10-inch TFT-LCD screen and a high-quality CCD camera to provide clear video monitoring, snapshot capabilities, and video recording. The system supports multiple secure entry methods including facial recognition, fingerprint scanning, code access, and card access for comprehensive security management.

Technical Specifications

Input Voltage	12 V
Operating Voltage Range	12V-18V
Minimum Illumination	0.1 Lux
Camera Sensor	CCD
Screen Size	10 inch

Physical Attributes

Installation Type	Flush mounted
Panel Material	Stainless Steel, Toughened Glass
Dimensions	340 x 275 x 28 mm
Operating Temperature	-40°C to 65°C

Features

Access Methods

Facial Recognition • Fingerprint • Code Access • Card Access

Core Functions

- Calling
- Talking
- Unlocking
- Transferring
- Snapshot & Video Record

Environmental Protection

Waterproof • Anti-vandal
